

2ND GENERAL BODY MEETING

ACM-W at UCF

PLEASE SIGN IN

- Sign in, please!
- bit.ly/signinACMW

MISSION

- To empower and engage women in computing

KEEP IN TOUCH :)

- Facebook: facebook.com/ucfacmw
 - Meeting recaps on FB after every meeting!
 - Email list signup is on Facebook
- Slack: ucfacm-w.slack.com
- Twitter: twitter.com/ucfacmw
- Email: ucfacmw@gmail.com

COMMITTEES

- Committees
 - Outreach, Marketing, Web Dev
- Please fill out an interest form if you're interested in committees (if you already have—thank you!)
 - Link to follow

COMMITTEES

- Wednesday we'll send an email to everyone who's filled out an interest form
 - We'll survey for committee meeting days/times
 - Meet every other week (opposite from GBM weeks)
 - Please only fill out the availability survey if you plan to participate and attend committee meetings

LINKS!

- Interested in joining a committee? Sign up here!

TWITTER CAMP

<https://takeflight18.splashthat.com/>

<https://careers.twitter.com/content/dam/careers-twitter/university/Diversity.pdf>

OPEN FLOOR

- We want to hear from you!

THIS OR THAT

- Left

- Pineapple on pizza
- Introvert
- Watching a movie
- Water is wet
- Video games
- Traveling

- Right

- No pineapple on pizza
- Extrovert
- Watching a TV show
- Water is not wet
- Books
- Stay-cation

THIS OR THAT

- Left

- Comedy

- Java

- Butter popcorn

- Mountains

- Star Trek

- Snow

- Right

- Horror

- C

- Kettle corn

- Beach

- Star Wars

- Desert

ESCAPE GAMES

- Escape the room game
- Usually some contrived theme that ties the puzzles together
- Lock types also offer clues (letters, numbers, other?)
- Locks are picky sometimes
- No brute force! (physically or algorithmically)
- No phones!! :D

- You and your friend have internships at Etnerprise Sotfware Solutons.
- Your friend just committed some bad code to GitHub.
- ESS's policy is that you can't do rollbacks of commits (so that you are more careful of the code you commit).

- You decide you have to hack into your CTO's account so you can reverse the commit, and spare your friend the shame.
- Your CTO is paranoid, but also forgetful, so they've hidden clues all around their office.
- You think that you can follow those clues to figure out their password to the repository.

- But the automatic build system will push the code to production in 30 minutes.
- You must race against the clock to find the password and enter it in the computer to save the day!

GAME DEBRIEF

- All the puzzles were technology or computer science inspired
 - Finite state machine
 - Symbols on puzzle
 - Code!
- If you want to look through the puzzles from another group, feel free!
